

Executive summary by Jack Ma, Chief Executive, 11 January 2025.

In 2024 Acme Corp continued its transformation from a single-product manufacturer into a federation of four operating subsidiaries: Acme Robotics, Acme Cloud, Acme Health, and Acme Foundry. The federation reports to the Acme Corp board, chaired by Diana Cole. Jack Ma serves as Chief Executive, supported by Chief Operating Officer Eric Tan and Chief Financial Officer Fiona Park.

Acme Robotics, led by Alice Smith, accounts for 41 percent of revenue. The subsidiary is headquartered in Singapore and operates manufacturing lines in Hanoi and Bangkok. Acme Cloud, led by Bob Jones, is headquartered in Berlin and provides the platform that powers Project Falcon, Project Atlas, and Project Nebula.

Acme Health, founded in 2023 and led by Carol Davies, operates from Sao Paulo and partners with Umbrella Industries on the Aurora clinical trial. Acme Foundry, led by David Lee, runs the legacy metallurgy plants in Pittsburgh and Birmingham.

Section: Strategic Partnerships.

Globex Ltd remained Acme Corp's primary logistics partner throughout 2024. Globex Ltd is headquartered in Berlin and is led by Henrik Mueller; the company operates delivery hubs in Singapore, Bangkok, and Sao Paulo. Under the renewed three-year agreement, Globex Ltd handles fulfilment for Project Falcon and for Acme Robotics spare-parts distribution.

Initech Inc supplied routing software for Project Falcon and Project Atlas. Initech Inc is based in Boston and was acquired by Acme Cloud in October 2024; its founder Greg Lin now reports to Bob Jones. The acquisition gave Acme Cloud control of the Atlas optimisation engine.

Umbrella Industries co-funds the Aurora trial alongside Acme Health. Umbrella Industries is headquartered in Zurich and is chaired by Helena Roth. The Aurora trial began enrolment in Sao Paulo in March 2024 and expanded to Mexico City in September. Carol Davies and Helena Roth co-chair the trial steering committee.

Section: Project Portfolio.

Project Falcon launched its Singapore pilot in June 2024 and went regional in September. The project is sponsored by Jack Ma and managed by Alice Smith; Globex Ltd is the logistics partner and Initech Inc supplies the routing engine.

Project Atlas is the second-generation analytics platform built by Acme Cloud. It is led by Bob Jones and uses the Atlas optimisation engine acquired with Initech Inc. Atlas powers reporting for Acme Robotics in Hanoi and for Acme Health in Sao Paulo.

Project Nebula is an Acme Cloud research initiative on edge AI. Nebula is led by Mia Patel, who reports to Bob Jones, and runs experiments at the Berlin and Tokyo labs. The Nebula team published two papers in 2024 with researchers from Globex Ltd's R&D unit in Berlin.

Project Aurora, the joint Acme Health and Umbrella Industries clinical trial, enrolled 1,200 patients in Sao Paulo and 600 in Mexico City. Aurora is co-chaired by Carol Davies and Helena Roth.

Section: People and Governance.

The Acme Corp board added two independent directors in 2024: Diana Cole [chair], previously of Stark Industries, and Omar Faruq, previously of Wayne Enterprises. The board now comprises seven members.

Executive committee: Jack Ma [CEO], Eric Tan [COO], Fiona Park [CFO], Alice Smith [CEO, Acme Robotics], Bob Jones [CEO, Acme Cloud], Carol Davies [CEO, Acme Health], and David Lee [CEO, Acme Foundry]. Alice Smith also chairs the safety committee.

Regional general managers: Hanoi office is led by Linh Nguyen who reports to Alice Smith; the Berlin office is led by Klaus Becker who reports to Bob Jones; the Sao Paulo office is led by Lucia Mendes who reports to Carol Davies; the Pittsburgh office is led by Robert King who reports to David Lee.

Looking ahead to 2025, Jack Ma confirmed that Acme Corp will open a new Acme Cloud data centre in Tokyo and that Acme Health will begin a partnership with Wayne Enterprises in Gotham on a follow-on trial code-named Project Beacon.
